1867

Tuesday, January 1.

Cloudy all day. Began to spit snow in the morning and increased during the day until in the evening it snowed quite fast. Rather cold and chilly. Went shooting in A. M. Sterling at 10. Shot a male red poll a Lesser red poll and a goldfinch. Saw numbers of more birds, gold finches, blue jays, about 5 or 6 robins, a purple finch, and heard a red bellied nuthatch but no cherry birds or fox colored sparrows. Got home from shooting about 1.30 P.M., got some lunch & then rode up to Davis but he had gone shooting; on the way found at last 2 or 3 red polls & met a man with 5 quails. In evening went up to the Russells & stuffed the Lesser Redpoll. Shot Saturday

After breakfast in A. M. finished the quail

Wednesday, January 2.

Alternately cloudy and
clear. The snow melted but
little. Sen P.M. finished
the redpoll stuffed yesterday
and skinned the remaining
one. In the evening went
up to the Russells to study
my Caesar and got home
at 9.15 P.M. Then I nearly
finished the redpoll skinned
in the P.M. Went to bed
at 10.30. The heifer came
in from the country to day.
Two men tried Hasty and gave
father in exchange. The
weather to day was not cold
but as there was little sun the
snow did not melt. Read some books
after dinner

Thursday, January 3.

Pleasant. At 8 A.M. Ther. at 4°
and about the same at 9 P.M.
at 3 P.M. 26°. The snow melted
considerably. When I got home
from school finished the redpoll
stuffed last night. Started
at 4 P.M. and rode up to
Waltham and saw Dan.
He had stuffed a pine
grosbeak and a pinnated
grouse. Got home at 5.30
P.M. We had a goose for
dinner. Studied on my
Caesar till 9 P.M. but did not
go up to the Russells. The
snow is about 5 inches deep.

Friday, January 4.

Clear and pleasant. At 8 A. M. Ther. at 4°, at 3 P. M. 27°, at 10 P. M. 12°. Went up to R. Danes with him as soon as I got home from school and saw a robin and a blue jay that he had stuffed since I was up there last. Starting at 3.30 P. M. rode up by the Watertown Arsenal, through Curkin's (where I saw 5 or 6 pine grosbeaks), and home by Fresh pond. In the evening went up to the Russells but only studied there about a half an hour then came home and studied till 9. Went to bed at 10 P. M.

Saturday, January 5.

William got hurt by falling off my horse, also called. Went up to the Russells in evening.

Cloudy all day. Had a most gorgeous sunrise. Went shooting in A. M. Starting at 6, but did not get a shot at any thing. Watched a golden winged woodpecker for some time & saw a snow bunting and a large flock of redpolls with a few gold finches intermixed. Got home at 10, got some breakfast and was off again. Shot a female white bellied nuthatch. Saw several flocks of redpolls but neither robins nor cedar birds. Saw song and tree sparrows but no fox colors for several weeks. Set a squirrel trap with Charlie in P. M. & while away Don came down and Dick.

Cloudy all day. Snowed all A.M. till one P.M. About three inches of snow had fallen during the night and three more fell in the forenoon. Went to church and to Sabbath school in A.M. but was late to the former. Theo. Russell was admitted into the church this A.M. Bill was but little better today so I had to go down and tell John Sovig to shovel out the snow. On the way home from church saw several redpolls, snow birds, and five snow buntings. Read most of P.M. but in the latter part walked up to Mt. Auburn and looked at my squirrel trap but they had not been near it. Read all the evening

Alternately cloudy and clear. Quite cold and very windy. The snow drifted a good deal. Got a ride in a private sleigh from the College to Hovey's. In P.M. stuffed the white bearded nuthatch shot Saturday and wound the tow into a ball for the first time. Had to stuff for about an hour after dinner in order to finish the nuthatch. Then studied on my Caesar till 9.30 P.M. and got it out without help. Fathers new mare had a sort of fit when she came in from a drive this P.M. and could hardly walk

Clear but very windy. At 8 A.M. Ther. at 12°; at 10 P.M. 15°
On the way home from school saw about 20 snow bunting light in Mr. Raymond's yard.
Went down to R. Dana's with R. Deane in P.M. and played billiards at his table. Then went up to my box trap with Charlie and set a wire trap that I bought on the way home from school.
Went up to the Russells in the evening with my Caesar as the lesson was quite hard but Mr. Russell went out before we had translated much. Father's horse was better to day.

Clear and pleasant but quite windy. Got a ride down to the sledges, and a ride up to them on the way home from school. On the way to school saw a flock of about forty snow bunting and one among them that looked like a shore lark. In P.M. rode up to my squirrel trap & met Charlie there. It was sprung probably by the wind. Rode up to Dana's through Waverly where I saw about 12 pine grosbeaks. At Dana's I found Ruth. who had driven his mother up in the sleigh. Saw a large flock of redpolls there and tried to shoot some but they flew. Dan had shot 2 snow bunting. Rode home with Ruth.

Thursday, January 10.

A.M. cloudy. P.M. clear. Got a ride from our horse to the colledges on the way to school and from the gymnasium home coming from school. Went shooting in P.M. into Watertown and both of us fired into a flock of about fifty snow buntings flying and killed a very handsome one. We "drew lots" for him but as I got him I gave him to Ruth Also saw five or six redpolls. Got home at 5.45 P.M. Saw a blue jay. Went up to the Russells in the evening about my Caesar which is very hard. Father & mother called on the Frenches

Friday, January 11.

Cloudy all day but occasionally the sun would shine out for a few minutes. Rode part of the way home on a spring. Went P.M. went shooting and I had only gone as far as Charles River when I saw four snow buntings feeding on the ground. Broke the leg of one but did not get him then followed them up and shot two and could easily have shot another. Came home with my gun and went up to my squirrel trap with E. Eastis and put it in a new place. Saw some more woodlarks on the other side of the river. Studied at home in the evening on my Caesar and father cleaned my gun. Thermal A.M. 12° at 9.30 P.M. 17°

Clear. At 6 A.M. Therat 10° at 9 P.M. 10° Went shooting in A.M. as usual starting at 6. Followed the track of a flock of quails for some distance and came to the place where they flew. Saw a blue jay. To my great surprise a male goldfinch in the full summer plumage flew over me. They were scraping a part of South pond. Got home at 9.30 A.M. and stuffed one of the snow buntings shot yesterday finishing him at 3 P.M. Went up to R. Davis's found him cleaning his gun. Rode up to Mt. Auburn on a hunt found my squirrel trap sprung with nothing in it. In the evening stuffed the other snow bunting

Cloudy all day. In the latter part of P.M. it spit snow. Went to church and Sabbath school in A.M. and was almost late to the former. Mr. Fowler preached. Read 'Homes without Hands most of P.M. At 4 P.M. took a walk up to Mt. Auburn St. and looked over the fence at my squirrel trap but it was not sprung. Saw a red fox. Read 'Homes without Hands' all the evening and went to bed at 8.45.

Monday, January 14.

Clear and rather warm in the middle of the day. Ther. morning and evening about 10°. Rode down to the colledges on the same pung that I catch almost every morning. In P.M. Diet came up and we coasted a little while on Sparks St. Then went over to Mt. Auburn St. and got several rides. Saw four more buntings in the usual place. Came back up Sparks St. on a pung and coasted some time on E. Dodge's double runner. Was late to dinner. Went up to the Russells in the evening about my Caesar. Went to Cedar street at 10.

Tuesday, January 15.

Clear and the snow melted slightly in the sun. At 7 A.M. Ther. at 2°; at 9 A.M. 10°. Got no rides either coming from or going to school. Coasted most of the P.M. on Sparks St. but once on Concord Avenue. Also got two rather short rides on pungs. Took a number of coasts on E. Dodge's double runner. Did not get up to the Russells in the evening but worked the Latin out myself. Was late to dinner. The sleighing still continues very good although it is getting a little worn. Saw four goldfinches.

Clear. At 7 A.M. Ther. at 6° below zero, at 10 P.M. 6°
Got a ride from the gymnasium to the mouth of Craigie St. Rode up to Davis ah P.M. and R. Deane went with his sleigh. Dan had gone shooting but I rode through the fields and met him: he had fired twice a quails and he had a grey squirrel stuffed which he had shot last Saturday. Started from there at about 5.15 and was at usual very late to dinner. Went up to the Russells in the evening and coasted down on my sled.

Cloudy all day. At 8 A.M. Ther. at 14° at 6 P.M. at 18°. When I woke up it was snowing hard but only about two inches had fallen. It snowed all day harder than I ever saw it before, indeed most of the time it was impossible to see more than eighty yards. Our school was dismissed an hour early and the snow was then nearly two feet on a level and some of the drifts 7 feet. It stopped snowing a little after dark. Spent all the P.M. in fixing my birds. Studied from 6.30 P.M. to 8. Read till 9.30 P.M.

Clear but very windy. Snow drifted all day. For A.M they ran a 'twelve horse' omnibus by here as the horse cars could not run. In A.M. Went up to the Russells, the Paines, and the Deanes but R. Deane had gone to school. Our school did not keep of course. In the A.M. E. Carter fired at a shrike. In P.M. piped the feet of my cock. Also went round and jumped about in the drifts. Afternoon went over to the river with E. Carter saw a gold finch and a meadow lark. In P.M. painted the legs & bill of my cock & R. Deane came down &c.

A.M. clear. P.M. cloudy. At 8 A.M. Thermometer 0° at 4 P.M. 8° below. In A.M. went up to R. Deanes. He came down with me and we went over to the river and cut a branch on which to place some of my birds. Saw two snow buntings, a tree sparrow, two redpolls, and two goldfinches. Brought my limb home, put 2 white bellied nuthatches, 2 red bellies, a brown creeper, 2 golden wings, a hairy woodpecker, and two downies on it. Went to ride in P.M. and watched a shrike for some time. The Horse railroad runs now from the square to the bridge. There is only a single path for a sleigh down Beattie St. Shot snow in P.M.

A.M. clear. P.M. cloudy.
Ther. at 8 A.M. 8 below at
1 P.M. 2 0°. at 9 P.M. 15°.
Went to church and sabbath
school in A.M. and was
late to the latter. Mr. Whipple
was not there. The men
employed by the Hoosac railroad
were casting the snow out
of the square and when
I was coming home from
church they were belonging
out the track with a common
iron plough. Walked up
from church with R. Deane.
Read all P.M. and J. Nichols
came in, in the latter part of
P.M. Read all the evening.
Went to bed at 10 P.M.

Cloudy all day. When I awoke
it was snowing and about a
foot of moist snow had fallen.
Nobody in this neighborhood
went to school so I did not. Ther
at 8 A.M. 32° at 2 P.M. 20°. At
10 P.M. 21° Snowed till 9.30 A.M. Then
changed to rain: cased at about 10 A.M
Snowed and rained part of P.M.
In A.M. rode the General up & down to
break out the path. In A.M. helped
William shovel out the width and
made a number of stands. In P.M.
took a ride with my horse and broke
out the path with hes. Father rode
into Boston with the General.
C. Carter saw two robins this A.
M. The rain has formed a slight
crust.

2

Clear all day. Cloudy in evening. Rode down to school with father and took in H. Whitney and E. Dodge. The snow melted considerably in the middle of the day. Snowballed all the way home & got here at 3.15 P.M. Went shooting in P.M. starting at 4. Found the feathers of a bird destroyed probably by a shrike & a skeleton containing the bill of a small bird. Went through snow nearly up to my waist for about 300 yards & found it pretty tough. Saw a snow bunting & two song sparrows plainly. Got home at 5.30 P.M. at 8 A.M. 20°; at 3 P.M. 34°; at 9.30 P.M. 26°. Got my Cabin out at home from 4 P.M. to 9 P.M. The crust bore sleds by this A.M.

Pleasant. Snow melted considerably in the middle of the day. Ther. at 8 A.M. 26°; at 3 P.M. 40°; at 10 P.M. 26°. Had a snow ball fight at recess. Rode from the Gymnasium to the foot of Craigie St. in coming from from school. Went shooting in P.M. & got a ride up to Mr. Templeton's. Saw about thirty robins, as many redpolls and about a dozen goldfinches and also a snow bird. Shot two handsome male Lesser redpolls and another which was either a young one or a female. Got home at 5.45 P.M. Went up to the Russells in the evening about my Cabin. On the way to school saw 1 or 2 snow buntings

Clear and pleasant. Snow melted considerably during the day. Ther. at 7 A.M. about 20° at 3 P.M. 34° at 10 P.M. 20° Rode down to school with father in A.M. Got a ride from the Washington Elm to the mouth of Craigie St coming home from school. The Horse Railroad ran cars for the first time since the snow storm from Mt. Auburn to the Square to day. In P.M. R. Deane called for me to go shooting but I staid at home & stuffed one of the redpolls shot yesterday. In the evening Uncle Albert came. Worked out my Latin & myself as it was very easy.

Clear. Cloudy in the evening. Rode down to school with father in A.M. and took in most of the boys. Coming home from school got a ride from the Colleges to Willard St. Had my name sent up to Mr Rolfe for throwing snow balls. In P.M. stuffed the remaining male redpoll shot Wednesday In the evening went up to the Russells but Thos was not at home so I got out my Latin at home as best I could. Before breakfast saw about 25 robins on our cedar tree. A boy said that he saw numbers of blue jays two days ago but I have seen none lately. There is crust sufficient to bear a sled.

Cloudy all day. Alternately
snowed and rained. Ther. at
6.30 A.M. 32°, at 3 P.M. 36°, at
9 P.M. 32°. Went shooting in
A.M. starting at 6. Saw either
a ruffed grouse or a quail
fly into the top of a pine tree
and fired into another pine
tree twice after from the
chickadees I know there was
an owl but I did not see
him. Saw a blue jay, two gold
finches and several tree sparrows.
Got home at 9.30 A.M. Spent
most of the day at the Nichols'
where we made two more visits.
Found a gold finch which had
died from hunger under our cedar
tree & the chickadees came into
the woodshed.

Clear but rather windy
Ther. at 8 A.M. 26°; at 3 P.M.
about 30°; at 10 P.M. 20°.
Went to church and Sabbath
school in A.M. and was
late to the latter. Mr. M.
preached his first sermon.
Read all P.M. and most
of the evening. In the evening
Mrs. Paine came in. Went
to bed at 10 P.M. The snow
has settled considerably but
the crust will not bear yet.
The sleighing is pretty good
although there are many
very bad "cradle holes"
The birds must have a hard
time of it as almost every thing
is covered up.

Clear. Snow melted very slightly during the day. Ther. at 8 A.M. 14°; at 3 P.M. about 28°; at 10 P.M. 14° When I got home from school partially made a bird trap out of a yeast box. R. Deane came down and saw my two last red polls. In P.M. went up to see Dan T. on the way saw about thirty crows and twelve crows flying southward. Had to wait some time for Dan. A boy had just given him a Cooper's hawk & a ferret. Saw 21 crows hunting on a pile of fresh & steaming manure. Got home at 6 P.M. Went up to the Russells to study my Caesar in the evening. Saw two more birds & a red poll. R. Deane saw 6 meadow larks

Clear. Snow melted only in the most sheltered places. Ther. at 8 A.M. 10°; at 8 P.M. 20; at 10 P.M. 10° Rode down to school with father. Got ten checks for throwing snowballs Friday. Began to review in Greek to day. Coming home from school got a ride from 'the Square' up to Dr. Worcester's Bought some tacks and some putty at 'the Square'. Wednesday, July 24.

Clear but uncomfortably warm. Good breeze most of the day. Ther about 75° — 80 — 76°. Rose only in time for breakfast. My poison probably reached its height by evening. In A.M. blew three of the 2nd. larks I found Monday and dried about two hours. Also copied a part of my log from my diary. Slept from 4 P.M. to 5.45 P.M. Then took a ride with father up to Mt. Auburn & up & down by the river. Spent most of the evening enjoying the cool breeze in front of the house.

A.M. rather hazy & exceedingly hot. Had a heavy thunder shower commencing at 2.45 P.M. & lasting till 5 P.M. the rain falling in torrents most of the time. Had breakfast at 6.45 A.M. & rode down to the Somerville station with mother & father as mother was going to Groveland. Ther. about 75° – 90° 70°. Spent most of A.M. in reading. All my poison is much better to day. Set my trap cage for a goldfinch but did not catch one. Went up to see Gotte & Charlie at about 6 P.M. & stayed till 7.40 P.M. Went to bed at 9 P.M.

from our visit to day. Cloudy most of the day but the sun shone out several times. Ther. about 75° – 85° – 65°. Intended trip at 4.30 but father stopped the clock just before it went off as it was then raining hard. Went after sails just after breakfast but soon as the water was too high. Shot two gnt. Larks one flying the other on a tree & a male bobolink. E. Easter shot 2 cowbirds & a bobolink changing. Rained hard for about an hour at noon, kept as dry as possible under trees. Got home at 3.30 P.M. Shot a female ruby throat in P.M. & picked feathers from breast. Cleaned my gun in P.M. Got the first ripe blackberries

Aunt Lizzie came to day.
Alternately cloudy and
clear Sprinkled once
